

MCDB Symposium

8:05am-
8:50am

Lauren Booth, Ph.D.

Postdoctoral Fellow
Stanford University of Medicine

“Sexual Interactions Induce Early Death in Nematodes: Strategies and Counterstrategies”

8:55am-
9:40am

Junyue Cao, Ph.D.

Postdoctoral Fellow
University of Washington

“Global, organism-scale views of cell state heterogeneity & dynamics via novel single cell profiling techniques”

9:55am-
10:40am

Jin Chen, Ph.D.

Postdoctoral Fellow
University of California, San Francisco

“Beyond the annotated proteome and the canonical rules of translation”

10:45am-
11:30am

Stephanie Ellis, Ph.D.

Postdoctoral Fellow
The Rockefeller University

“Fighting to Build a Wall: How Cell Competition Shapes Tissue Morphogenesis in the Skin”

12:55pm-
1:40pm

Richard Marshall, Ph.D.

Research Scientist
Washington University, St. Louis

“Autophagic Degradation of Macromolecular Complexes from Plant Biology to Human Disease”

1:45pm-
2:30pm

Michael Patnode, Ph.D.

Postdoctoral Fellow
Washington University, St. Louis

“Dietary Plant Polysaccharides Mediate Interactions between Human Gut Microbes In Vivo”

Thursday, January 9, 2020

8:00am – 2:30pm

O.C. Marsh Lecture Hall

260 Whitney Avenue, New Haven

*Lunch and Refreshments will be served
