

The Chemical Biology Seminar Series Presents:

"Bacterial Drug Metabolism Transforms an Immunomodulator into Structurally and Functionally Divergent Antibiotics."

Speaker: Tyler Goddard
Crawford Lab
Dept. of Chemistry

"structure elucidation is colibactin."

Speaker: Mengzhao Xue
Herzon Lab
Dept. of Chemistry

Hosted by: Edward deRamon

Seminar is mandatory for all current CBI Students

Yale Science Building 352

Friday

November 1, 2019

11:45 - Pizza and Soda

12:00 – Seminar
