

Research in Progress

MCDB 902/3; Advanced Graduate Seminar

Friday, September 14, 2018

9:00am -10:00am

BASS 305

266 Whitney Ave., New Haven

This week's speakers are:

Thomas Young, Acar Lab

“Quantitative insights into age-associated DNA-repair inefficiency by tracking single cells aging in real-time”

Jennifer Sun, Carlson Lab

“Humidity response depends on the small soluble protein Obp59a in *Drosophila*”

All are welcome to attend... we hope to see you there!
