

Graduate Student RIP

November 9, 2018; 1:00pm – 4:40pm

Location: OML 202

165 Prospect Street, New Haven, CT

Research in Progress, MCDB 902/903; Advanced Graduate Seminar

1:00pm – 1:20pm

Holly Merta; Bahmanyar Lab

"Regulation of ER membrane biogenesis controls nuclear envelope assembly"

1:20pm – 1:40pm

Lucas Sanor; Crews Lab

"CRISPR/Cas9-generated allele selection screen in regenerating haploid limbs of axolotl chimeras"

1:40pm – 2:00pm

Roccio Saavedra; Rodeheffer Lab

"Nutritional mechanisms driving type II diabetes"

2:00pm – 2:20pm

Ephrath Tesfaye; Dimitrova Lab

"Characterizing novel long noncoding RNAs in the p53 tumor suppressor network"

2:20pm – 2:40pm

Renee Wasko; Horsley Lab

"Dissecting the contributions of Langerhans cells to skin wound healing"

2:40pm – 3:00pm

BREAK – OML 202 Lobby

3:00pm – 3:20pm

Javier Portillo; Breaker Lab

"RNA polymerase ribozymes and the RNA world"

3:20pm – 3:40pm

Ben Akhuetie-Oni; Isaacs & Lin Labs

"Regulating Cas9 activity via engineered nucleic acid interactions"

3:40pm – 4:00pm

Zachary Sebo; Rodeheffer Lab

"A mesodermal fate map for adipose tissue"

4:00pm – 4:20pm

Lauren Penfield; Bahmanyar Lab

"Dissecting mechanisms of nuclear envelope sealing in oocyte meiosis"

4:20pm – 4:40pm

Gadareth Higgs; Breaker Lab

"Discovery of novel riboswitch candidates in five bacterial genomes"

All are welcome to attend... we hope to see you there!
